# About KREDICT

---

We believe that people have a fundamental need for security and that the use of secure solutions enables every person to use the Internet and every other connected technology. We aim to provide security consulting services to help others make their solutions more resistant to unauthorized access to data & inadvertent manipulation of the system. We support teams from the design phase through the production to launch and surely after.

The KREDICT team has skills for reviewing code in C, C++, Python, Haskell, Rust, Node.js, Solidity, Go, and JavaScript for common security vulnerabilities & specific attack vectors. The team has reviewed cryptographic protocols and distributed system architecture implementations, including in cryptocurrency, blockchains, payments, and smart contracts. Additionally, the team can utilize various tools to scan code & networks and build custom tools.

Although we are a small team, we surely believe that we can have a momentous impact on the world by being transparent and open about the work we do.

For more information about our security consulting, please email us at **[support@kredict.com](mailto:support@kredict.com)**
